

IADS HACKATHON

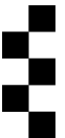

AI AGENTS ON ORACLE CLOUD INFRASTRUCTURE (OCI)

48-Hour AI Hackathon | Real-World Challenges | Industry Collaboration

**2-4 June 2026,
STEM 4.1, University of Essex**

Thank you for joining the IADS Agentic AI Hackathon 2026.

Over the next 48 hours, you will work in teams to design, build, and deploy an AI-powered agent that solves a real-world enterprise problem.

Hackathon Objective

What is the Goal?

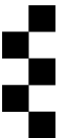

Build an AI-powered agent that:

- ✓ Solves a real-world business problem
- ✓ Demonstrates AI reasoning and automation
- ✓ Utilises Oracle Cloud Infrastructure (OCI)
- ✓ Delivers measurable business value
- ✓ Can be demonstrated as a working prototype

Think Beyond a Chatbot

We are looking for:

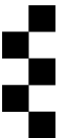

- ✓ AI Agents
- ✓ Retrieval-Augmented Generation (RAG)
- ✓ Workflow Automation
- ✓ Intelligent Decision Support Systems
- ✓ Enterprise AI Solutions

Challenge 1: Contract Review Agent

Build an AI-powered assistant capable of:

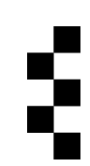

- Analysing legal documents and contracts
- Generating concise summaries
- Identifying risky clauses
- Highlighting liabilities, penalties, and obligations
- Supporting question answering over contracts

Challenge 2: Customer Support Triage Agent

Develop an AI system that can:

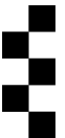

- Classify customer support requests
- Determine urgency and priority
- Generate ticket summaries
- Route requests to appropriate departments
- Suggest relevant responses or help articles
- Query customer for information that can help in accurate routing of requests

Challenge 3: Natural Language Query Agent

Create an AI assistant that:

- Converts natural language into SQL
- Queries structured databases
- Returns accurate results
- Generates summaries and insights
- Makes data accessible to non-technical users
- Produce results based on available data and if exact data is not available, make Vector based decisions and provide similar results

Rules & Expectations

Rules

Teamwork

- Work only within your assigned team.
- All team members should actively contribute.

Data

- Use open-source or publicly available datasets.
- Do not use copyrighted or confidential datasets.

Development

- Any programming language is allowed.
- Solution must be created in OCI Cloud.

Integrity

- Use AI tools responsibly.
- Be prepared to explain your code and architecture.

We expect

- A working prototype
- AI-driven functionality
- Clear system architecture
- OCI integration
- Professional presentation

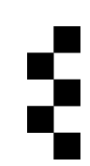

Evaluation Criteria

Criteria	Weight
Problem Understanding	15%
AI Architecture	15%
Functionality	20%
OCI Usage	10%
Innovation	15%
User Experience	10%
Business Impact	15%

Scoring System

Each criterion will be scored on a scale of:

- ★ 1 = Poor
- ★ ★ 2 = Fair
- ★ ★ ★ 3 = Good
- ★ ★ ★ ★ 4 = Very Good
- ★ ★ ★ ★ ★ 5 = Excellent

Submission & Demo Requirements

Final Submission: Thursday, 4 June 2026

 Submission Deadline: 12:00 Noon

Each team must submit their final presentation slides (PowerPoint or PDF)
via email to:

Dr Haider Raza

 h.raza@essex.ac.uk

 Late submissions may not be considered for judging.

Team Pitch Session

Thursday, 4 June 2026

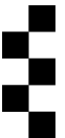

- Starts at 2:00 PM Sharp

Each team will receive:

- 5 minutes for presentation and demo
- 2 minutes for Q&A

What Should You Present?

1. Problem Statement
2. Proposed Solution and USP
3. AI Architecture
4. OCI Services Used
5. Live Demonstration
6. Business Value

Judging, Awards & Logistics

Awards

-  Winner
-  First Runner-Up
-  Second Runner-Up

Winner Announcement

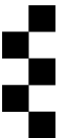

-  Approximately **3:30 PM**
- Followed by:
-  Prize Distribution Ceremony

Catering & Refreshments

- Lunch will be provided on:
-  3 June 2026
-  4 June 2026

Refreshments:

-  Tea
-  Coffee
-  Snacks
-  Soft Drinks

Final Message

Build. Learn. Collaborate. Innovate.

Over the next 48 hours:

- Focus on solving a real problem
- Build a working solution
- Make effective use of AI and OCI
- Outline System Architecture diagram showing OCI Resources
- Demonstrate business value
- Learn from your teammates

Remember

A working prototype with clear business value will score higher than an ambitious idea that cannot be demonstrated.

Good Luck Everyone!
IADS Agentic AI Hackathon 2026
2–4 June 2026
